

MODULES - Contract, Rights and Royalties

Keep track of all your agreements and digital rights with Schilling Contracts, Rights & Royalties

With Schilling Royalty and Rights you will have the full overview of your contracts – even the most complex ones. It is easy to work with all types of rights in real time, including resale, posting, payments on time, and reprocessing of returned goods.

The many features include:

- Easy handling of currencies, duties, fees, advances, disbursements, guarantee amounts, quantity-dependent rates, reductions, etc.
- Advanced currency handling of contracts throughout the world, including payment currency, sales currency, and basic currency.
- Keep track of tax rates from different countries, depending on whether you are an author or an heir, including the possibility to print tax information for the tax authorities.
- Use of ISTC codes and specification of rights, including all aspects: duration of the contract, rights of the publishing house, subsidiary rights, where in the world they can be handed over, territories, countries, languages, exclusive or non-exclusive.
- Easy follow-up on outstanding options and sold rights, amounts due with regard to advances, royalty for use in standard reports and statistics.

All contracts are recorded centrally and can be accessed from different places in the Schilling system.

As an extra service you can give your authors and agents access to Schilling's online author portal with information about agreements, bills, current sales, etc. Here your users can also see available and sold rights, request readers' copies, and participate in auctions. At the same time, you save on paper, envelopes, and postage.

Benefits:

- 100% overview, correct payments, and rights management with one of the world's best royalty and rights systems.
- Better service and happy authors when they are able to keep track of their sales and get all the relevant information they need.
- Save time and reduce costs with automated processes and fewer work routines.
- Enhanced efficiency and streamlined work routines with user-friendly templates that take all the necessary aspects into account.
